1.32	Earnings per share - Group share Net income - Diluted	Diluted earnings per share are calculated based on the same net income (see 1.28), adjusted for the finance cost of dilutive debt instruments, net of the related tax effect. The number of shares used to calculate diluted earnings per share takes into account the conversion into ordinary shares of potentially dilutive instruments outstanding during the period. These instruments are considered dilutive when they have the effect of reducing earnings per share of continuing operations.

The weighted average number of mobile only customers is the average of the monthly averages during the period in question. The monthly average is the arithmetic mean of the number of customers at the start and end of the month. ARPO is expressed in monthly data. Mobile only ARPO does not include incoming and visitors roaming revenues.
2.29	Mobile contract churn excluding M2M (quarterly)	Number of total mobile contract customers (excluding M2M) who disconnect or are considered to have disconnected from the network, voluntarily or involuntarily (excluding money-back return and fraudulent connections) over the past three months, divided by the weighted average number of total contract customers (excluding M2M) over the same period.
