Protecting the planet we live in

Recycling Plastic Bottle Caps:

Each of our department collects their plastic bottle caps and cans to recycle each month.

We have collected 11,000 bottle caps and 11KG of aluminum caps and donated to Green Wheelz, a local initiative that helps recycle the caps and cans to donate funds to the children with cerebral palsy to help with their medication.

Recycling Competition:

Our departments created artistic products from recyclable materials. We held an exhibition to show case the products and vote for the winner.

We recycled several products such as paper, plastic, carton, coffee capsules, corks, cans, tyres.

The event was held to raise awareness to over 60 guests on the several ways to use recyclable materials.

How we are affecting
our partners

Green Meetings

Our meeting rooms are well-equipped with sustainable solutions for a greener environment. We are offering this solution as the first choice to our guests.

We have a green menu in hand, use daylight instead of artificial light, recycle bins are in place, touch screens are used instead of flip charts, notepads and pens are on request.

Green Hotel

Our hotel is electrically generated by a solar PV system which helps generate an average of 2 million KWH a year. The implementation of this system is one of our solutions to take the environment into consideration.

Supporting Local Artists

We believe in supporting local talents therefore we have partnered with local artists Suzanne Saoub in providing us painting and creating murals in the hotel to showcase her work. She has provided over 10 paintings and painted the infamous mural at our rooftop pool.

Supporting Local Produce

We continuously purchase local ingredients from local suppliers such as herbs, olives, dates and ingredients that are used in our daily food preparation. 75% of our food is made from local products

We also display products at our deli for guests to purchase.
