It consists of (a) financial liabilities excluding operating payables (translated into euros at the year-end closing rate) including derivative instruments (assets and liabilities), less (b) cash collateral paid, cash, cash equivalents and financial assets at fair value. Furthermore, financial instruments designated as cash flow hedges included in net financial debt are set up to hedge in particular items that are not included therein, such as future cash flows. As a consequence, the portion of these unmatured hedging instruments recorded in other comprehensive income is added to the gross financial debt to offset this temporary difference.

1.32	Earnings per share - Group share Net income - Diluted	Diluted earnings per share are calculated based on the same net income (see 1.28), adjusted for the finance cost of dilutive debt instruments, net of the related tax effect. The number of shares used to calculate diluted earnings per share takes into account the conversion into ordinary shares of potentially dilutive instruments outstanding during the period. These instruments are considered dilutive when they have the effect of reducing earnings per share of continuing operations.
